

CamperPlaces - Cookie and Tracking Notice

Last updated: 18 May 2025

This notice explains how CamperPlaces uses tracking technologies. As a mobile app, we do not use browser cookies. However, we use similar technologies through Firebase.

1. What We Use

- **Firebase Analytics:** collects anonymous usage data (screens visited, features used, session duration). This data is aggregated and not linked to your identity.
- **Firebase Crashlytics:** collects crash reports and diagnostic data including device type, OS version, and app state at time of crash. Active by default for app safety.
- **Firebase Performance Monitoring:** measures app performance including loading times and network request durations.

2. Your Consent

Firebase Analytics is only activated after you give consent when you first open the App. Crashlytics and Performance Monitoring are active by default as they are necessary for technical operation.

You can withdraw your consent to Firebase Analytics at any time in App settings under Privacy > Analytics.

3. Data Transfer

Firebase processes data on Google's servers, primarily in the United States. See our Privacy Policy for details on international data transfers.

4. Third-Party Tracking

We do not use any third-party advertising networks. We do not share tracking data with advertisers.

5. Contact

For questions about tracking: Lorenz Magg, Imagg@gmx.at
